

# BUSINESS WASTE SOLUTIONS

## Tool 3 - Waste Segregation Infrastructure

**Disclaimer:**

The following pages provide an overview of products that are available from a variety of sources for similar prices and do not provide an exclusive list of all options available to your business. The following is provided by AWARE for information and does not represent any endorsement/recommendation from program funder the Resort Municipality of Whistler.

Product prices and items highlighted in this document are provided for indication only and reflect availability at the time this document was compiled.

When purchasing waste infrastructure or new bins we recommend you take the colour coding highlighted below into consideration. These colours are being used to standardise waste signage at all waste facilities throughout the regional district and also in Metro Vancouver, this means aligning with the colour coding will make it easier for your staff and guests to quickly identify where items belong.

Pre-made signage has been created to fit various print formats – from garbage room walls to small countertop collection bins. If you need to print replacement or additional signage following the business support program it can be accessed at [www.awarewhistler.org/businesswastesolutions](http://www.awarewhistler.org/businesswastesolutions).

Whether you are repurposing existing bins or buying new try to use black bins for garbage, green for organics and blue / grey for all recyclable products with colour coded signage.

**Counter Top Collection – Provide small collection containers in workstations so that they can be easily utilised by staff. Consider what you already have available in your establishment that may serve this purpose, e.g. small buckets, inserts, etc. Ensure whatever you use can be washed or lined.**

**Medium-Sized Collection Bins – Organics bins are heavy and so use of a mid-sized wheeled container helps keep weights manageable for moving organic waste to the garbage room. The intent for these mid-size bins is that they can be emptied into your larger bins in the garbage room. Consider where you can rinse mid-sized bins (normally where you clean mop buckets) and whether a liner is needed.**
