

Tree-united

Did you know: Whistler's oldest recorded tree is found in the Callaghan at 1200+ years old - found through AWARE tree coring. Contact us to purchase your own Old and Ancient Whistler Tree map!

How many different trees are growing near your house? Can you name them?

Coniferous trees stay green year-round and deciduous trees lose their leaves in the fall. Do you see more coniferous or deciduous trees in your neighbourhood?

Let's look for saplings! Record the differences you see between a sapling and an adult tree of the same species.

Which tree(s) are your favourite? Why?
