

Pigs Fly

Just because an animal has wings doesn't mean it can fly.

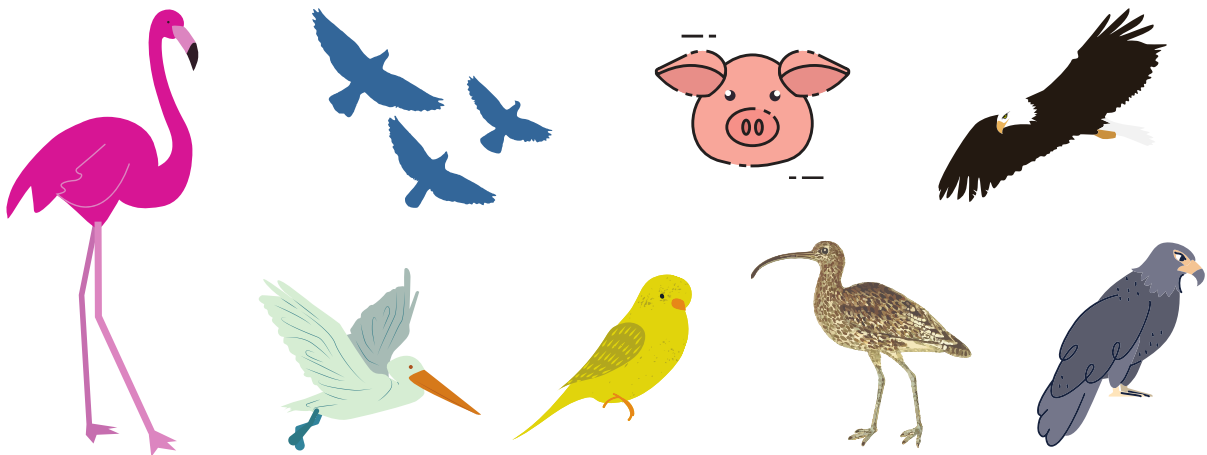

Background: Try this game to test knowledge of birds that fly.

Materials: None.

Instructions:

- Stand in a group facing parent/supervisor.
- Each child should have enough room to make full "flapping" movements with their arms.
- The leader calls out "Ducks Fly", "Owls Fly", "Pigs Fly"...and so on.
- If the animal that is called out really does fly, the children should continue flapping their "wings".
- If the animal called out is one that does not fly, then the children should stop flapping.
